A SHOWCASE OF DETAILED  
MODEL KITS AND FINISHED  
DISPLAY MODELS

## ABOUT US

Rui Ye International Co., Limited was founded in Hong Kong in 2011.

The company is dedicated to developing and selling high-end scale model kits globally. It has an excellent R&D team as well as a mature marketing team. With the aim to provide top-notch models for model fans worldwide, we have been trying to reproduce every detail of the original objects, to provide enthusiasts with both perfect model kits and wonderful modeling experience. Our products have been sold to districts and countries around the world, including Hong Kong, Japan, the United States, South Korea, Canada, Ukraine, Czech, France, Italy, Russia and etc. We have already established a long-term cooperating relationship with distributors in many countries. Ever since the debut of our products into the market, they have earned a high reputation for their novel subjects, innovative designs and exquisite craftsmanship.

In February, 2012, our first product won the award "Model of the Year 2012" prize by German ModellFan. With the expanding brand culture, we are currently growing fast and heading towards the goal of becoming world's top model brand.

1/35 PICK UP w/ZPU-1

## PICK UP w/ZPU-1

## PICK UP w/ZPU-1

Pick up is a light motor vehicle with an open-top rear cargo area which has been widely used in various fields nowadays. The manufacturers of automotive vehicles from all over the world such as Toyota, Ford and Nissan etc. treat it as a very important series, and replace the older generations by new ones constantly.

# PICK UP w/ZPU-1

VS-001

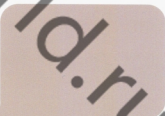

## KIT INFO

1/35 scale highly percussive pick up model is 133mm in length, 57mm in width and 51mm in height. Its streamline modeling embodies perfectly. There is a highly percussive zpu-1 (14.5mm) heavy machine gun with two options for the barrel. There is also a figure included in the box. The kit can be made into civil version or military version with many kinds of painting options available.

## PICK UP w/EQUIPMENT

## KIT INFO

1/35 scale highly percussive pick up model is 133mm in length, 57mm in width and 51mm in height. Its streamline modeling embodies perfectly. There is a M240 machine gun, a M82 sniper rifle, abundant equipment and a figure included. The kit can be made into civil version or military version with many kinds of painting options.

## ISRAEL MAIN BATTLE TANK MERKAVA MK.3D EARLY

The Merkava Mk.3D Main Battle Tank (MBT) in service in Israel Defense Forces (IDF) is the revised version of the Merkava Mk.3, equipping with a 120mm smoothbore gun, the BAZ gunner's sight and the panoramic commander's sight. The detachable add-on armor plates at the turret roof and its sides greatly increased the protection ability.

# MERKAVA MK.3D EARLY

ISRAEL MAIN BATTLE TANK

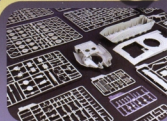

## KIT INFO

The Merkava Mk.3D MBT model kit in 1/35 scales with length 258mm and width 111mm. Precise reproduction of the turret characteristics of the Merkava Mk.3D. Two options for road wheels and driver's hatch. The headlights can be opened and closed as you like. All periscopes can be made open or closed. The subtle tie-downs at the rear of the turret are easy to assemble. Two painting options are provided.

BRITISH HEAVY ASSAULT TANK  
**A39 TORTOISE**

1/35  
SCALE

**MENG**

**BRITISH A39 TORTOISE  
HEAVY ASSAULT TANK**

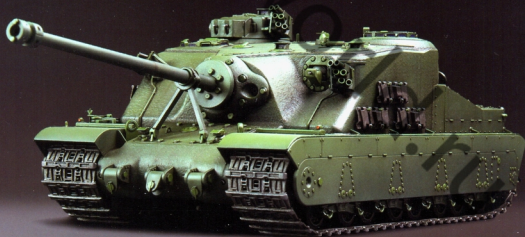

In late WWII, UK developed a huge monster as heavy as 79 tons, the British A39 Tortoise Heavy Assault Tank, to strike German solid fortifications. It was designed with a fixed fighting compartment and extremely thick armor. The heavy hull was supported by a torsion bar suspension system. Its incredibly powerful 94mm gun could fire at any ground target.

# A39 TORTOISE

BRITISH HEAVY ASSAULT TANK

TS-002

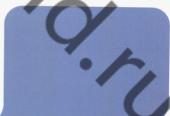

## KIT INFO

The 1/35 scale plastic model of the British A39 Tortoise Heavy Assault Tank is 293mm in total length and 111mm in width. Its huge general shape is accurately reproduced, and the large area of casting texture and weld seam details of the fighting compartment greatly increase sense of reality. The 94mm long barrel gun can turn like in the real tank and the solid gun mantlet is accurately reproduced. The travel lock can lock the gun like a real one. The MG in the front ball mount can rotate freely. All hatches can be assembled open or closed. Complicated wheels and staggered torsion bar suspension system are perfectly modeled.

## FRENCH MAIN BATTLE TANK AMX-30B

AMX-30 was a second-generation main battle tank equipped by the French Army (Armée de Terre). AMX-30B was its first production version. AMX-30 sacrificed protection for light weight so as to obtain strong mobility. It was equipped with a 105mm L/56 rifled gun and also a 20mm autocannon against slow flight vehicles.

French, Saudi Arabian and Qatari AMX-30s saw operation during the Gulf War in 1991.

# AMX-30B

## FRENCH MAIN BATTLE TANK

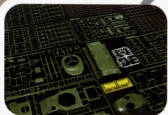

## KIT INFO

1/35 scale French AMX-30B MBT plastic model kit. 271mm in total length and 89mm in width. Casted turret shape is realistically reproduced on the model; the gun and 20mm autocannon can elevate independently; hatch on commander cupola can rotate in 360 degrees; realistic running gear parts on the chassis are movable; elastic torsion bar structure combined with movable hydraulic shock absorbers can realize the shock absorption action like the real vehicle; workable track links are easy to assemble. Two painting options are provided.

THE TANK MUSEUM

## FRENCH AUF1 155mm SELF-PROPELLED HOWITZER

AUF1 155mm Self-propelled Howitzer is a heavy ground weapon developed by French Groupement des Industries de l'Armée de Terre (GIAT) in the 1970's. It is based on modified chassis of AMX-30B MBT and equipped with a 155mm 39-caliber gun with an auto-loading system. It is also equipped with a roof-mounted 12.7mm anti-aircraft gun.

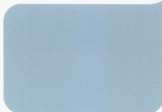

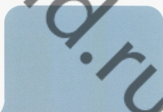

# FRENCH AUF1

155mm SELF-PROPELLED HOWITZER

## KIT INFO

1/35 scale plastic model kits of French AUF1 155mm Self-propelled Howitzer, with a length of 293mm and a width of 90mm. The model accurately realized the interior construction of the turret. Hatches of turret can be built open or closed. Torsion bar suspension and running gear parts of chassis are movable by inheriting the original design of AMX-30B MBT. The specially designed PE parts and track assembly tool bring more convenience to the modeling process.

## 9. 13. 2019

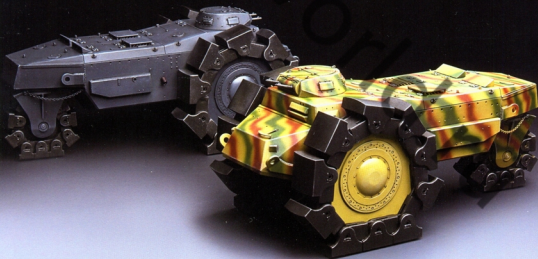

Vskfz 617 is a German mysterious weapon used in World War II and has an unknown story. The strong and gigantic wheels are used for the detonation of mines to obtain a cleared access path for German infantry and AFVs. The vehicle has a turret of Panzer I tank which is equipped with mg-34 machine guns ensuring the close defense of the machine. It is said that Vskfz 617 had been through the battle of Kursk.

# VsKfz 617

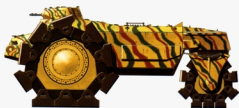

## GERMAN MINENRAUMER

## KIT INFO

1/35 scale highly percussive Vskfz 617 minesweeper model kit is 188mm in length, 91.5mm in width and 81.5mm in height. The shoes which have the metal blocks inside are included in the box. The three wheels can be moved and turned freely. Separate molding links reproduce the appearance of real vehicle precisely so as to make the wheel-making easier.

**MENG**

Model for assembly and painting. All  
 components are made of plastic. No  
 glue is required.  
 Recommended age: 14 years and over.

1/72

## JAPANESE KAYABA Ku-4 RAM-JET FIGHTER

In order to reach the demands of Japanese army, Kayaba had developed three types of fly wing gliders successively. Then they accomplished blueprints of "Katsudori" fly wing at the end of April, 1940 and produced a prototype very soon. Its airframe was metal skin. Its length, altitude and wingspan were 4.48m, 1.85m and 8.99m respectively. Although it's a power fly wing, its military number still denoted glider: "Ku-4".

# JAPANESE KAYABA Ku-4 RAM-JET FIGHTER

## KIT INFO

1/72 scale highly detailed WWII Japanese Kayaba "Katsudori" Ram-Jet Fighter model kit is 62mm in length, 21mm in height and 125mm in wingspan. Two kits are included in the box. Accurate fuselage, detailed cockpit and the air inlet are delicately presented. Rocket booster, ground handling trolley and bomber's pylon are also supplied for various applications. IJA and IJN painting options are provided.

Manshu Ki-98

## JAPANESE MANSYU Ki-98 ATTACK AIRCRAFT

Ki-98 was a Japanese piston-engined air raider designed and manufactured by Manchurian Aero-plane Manufacturing Company Ltd. in Manchuria at the end of the World War II. The prototype was incomplete when the war came to an end and its drawings were destroyed by Japanese forces.

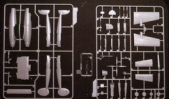

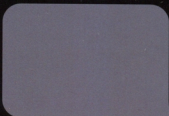

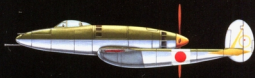

# JAPANESE MANSYU Ki-98 ATTACK AIRCRAFT

## KIT INFO

1/72 scale highly detailed WWII Japanese Ki-98 air raider model is 159mm in length, 51.5mm in height and 157mm in wingspan. One aircraft kit is included in the box. The aircraft is precisely reproduced and the cockpit is detailedly presented. Three painting options including IJA, Manchurian Air Force and Royal Thai Air Force are provided.

## F-102A (Case X)

F-102A Delta Dagger, designed and manufactured by Convair, was the first supersonic all-weather interceptor and also the world's first aircraft applied the 'Area Rule'. There were two different wings for the F-102As: the 'Case X' and 'Case XX' wings. The F-102As were mainly deployed in North America, while a small number of them were deployed in overseas bases during its service.

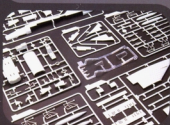

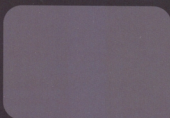

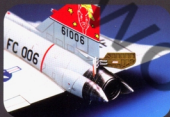

# F-102A (Case X)

## KIT INFO

1/72 scale plastic model kit of F-102A Delta Dagger is 289mm in total length and 161mm in width. It offers several strictly verified painting options, the best assembly and precise fit. The weapons bay can be built either open or closed. Built-in missile pylons are retractable. The cockpit is detailed and its canopy can also be built either open or closed. The exhaust nozzle is precise. Accurate model lines completely reproduce the perfect shape of the Area-ruled F-102A aircraft. Besides, the landing gears and airbrakes can be built either open or closed as well.

## **F-102A (caseX)**

### **F-102A (Case X) "GEORGE WALKER BUSH"**

F-102A Delta Dagger, designed and manufactured by Convair, was the first supersonic all-weather interceptor and also the world's first aircraft applied the 'Area Rule'. There were two different wings for the F-102As: the 'Case X' and 'Case XX' wings. The F-102As were mainly deployed in North America, while a small number of them were deployed in overseas bases during its service. F-102As also served in Vietnam War.

## **F-102A (Case X)**

*"George Walker Bush"*

## KIT INFO

1/72 scale plastic model kit of F-102A Delta Dagger is 289mm in total length and 161mm in width. This kit is the limited edition offered by MENG for IPMS (UK) Scale ModelWorld 2012. It's the kit with rich details in the wing. The cockpit is detailed and its canopy can be built either open or closed. The weapon bay is precise. Built-in missile pylons are retractable. Accurate model lines completely reproduce the perfect shape of the aircraft. Besides, the landing gears and airbrakes can be built either open or closed as well. The marking for aircrafts from the 111th Fighter Interceptor Squadron (FIS) of Air National Guard Station is provided.

## G.91R LIGHT FIGHTER-BOMBER

G.91 was the first combat aircraft designed and developed by Italy itself after WWII. It served in the Italian Air Force and the Luftwaffe. It was also used by the Portuguese Air Force for the war of Africa. Besides, G.91s were used by the Freccie Tricolori from 1964 to 1981. G.91R was the most widely used version in the G.91 series.

# G.91R LIGHT FIGHTER-BOMBER

## KIT INFO

1/72 G.91R Light Fighter-Bomber plastic model kit. It's 143mm long and 118mm in wingspan. Two variant options provided: R/1 or R/3. Landing gear, canopy and airbrakes can be built to be open or closed. Three types of rocket launchers and one type of bomb provided. Three painting options provided (including the Freccia Tricolori markings). A PVC velcro badge of Freccia Tricolori of Italian Air Force included as a gift.

## MIDDLE EASTERNERS

Figures presented in this kit are civilians frequently appearing in local conflicts in modern Middle East region. 1 militiaman having a rest, 1 walking woman and 2 children are included. Their poses are natural and vivid. Lively and interesting dioramas can be created by collocating them with pickups. As these civilians are dressed in common clothes, you have every freedom to paint them as you want, without any limitation.

## MIDDLE EASTERNERS

## MESSERSCHMITT Me-410B-2/U4 HEAVY FIGHTER

The Messerschmitt Me 410, nicknamed the Hornisse ("Hornet"), was a German heavy fighter and Schnellbomber used by the Luftwaffe during World War II. It was developed from the Me-210 and fitted with a more powerful Daimler-Benz DB 603A engine, which greatly improved its flight performance. A BK5 50-mm cannon was added to the Me-410B-2/U4, which greatly enhanced the combat capabilities. Hence it was called "bomber-killer".

# MESSERSCHMITT Me-410B-2/U4

HEAVY FIGHTER

## KIT INFO

1/48 scale Messerschmitt Me-410B-2/U4 heavy fighter plastic model is 278mm in length and 340mm in wingspan. Beautiful lines of this aircraft are reproduced perfectly on the model. The cockpit is detailed and the engine is accurately reproduced. Gun turret in the center of the fuselage is movable as in the real aircraft. Angle of flap, aileron, elevator, rudder can be selected. Engine radiator can be open or closed. Two painting options are provided.

## CLOSE PARTNER

### THE TANK MUSEUM

[www.tankmuseum.org](http://www.tankmuseum.org)

The Tank Museum (previously The Bovington Tank Museum), established in 1947, has one of the finest and most historically significant collections of fighting armor in the world. Unrivalled in scope and depth, the Tank Museum cares for 300 vehicles from 26 nations which is one of the largest collections of tanks and armored fighting vehicles in the world. The collection ranges from "Little Willie", the world's first tank, through to the British Army's current Main Battle Tank, Challenger 2. The collection also includes the only working example of a German Tiger I tank.

Since the very beginning of its establishment, MENG has established and maintained a very good cooperation relationship with the Tank Museum. With the help and support from the Tank Museum, MENG has already brought TS-002 British A39 Tortoise Heavy Assault Tank and TS-003 French Main Battle Tank AMX-30B into the model world. These model kits have been well received by modelers. MENG even invited one real AMX-30B tank to show in the IPMS(UK) Scale Model World 2012 to accompany the release of the TS-003 French Main Battle Tank AMX-30B kit.

**Desert Eagle**  
PUBLISHING

Michael Mass has had extensive experience with Israel Defense Force (IDF) armored fighting vehicles (AFVs) throughout his military service and his business career. He joined the IDF at 19 to begin his military service as a T-55 mechanic with the Armored Corps during October 1973 Yom Kippur War. He later trained corps personnel on the tank and served for several months as chief inspector. Michael subsequently attended officer training school, where he was commissioned as an ordnance officer. He held various field assignments with Armored Corps units, and subsequently became a Lieutenant Colonel (Res.) in the Israeli Armored Corps. Since 1986, Michael has worked in the defense industry, specializing in AFV improvements and maintenance. He became curator of the Yad La-shiron Memorial Site and Museum in Latrun in 1990. He also established the Israel chapter of the International Plastic Modelers' Society and its magazine.

With the help of this partner, MENG has already released TS-001 Israel Main Battle Tank MERKAVA Mk.3D Early and TS-005 Israel Main Battle Tank Merkava Mk.3 BAZ w/Nochri Dalet Mine Roller System. These model kits are very popular among modelers in the world. MENG will continue the partnership with Michael Mass to bring more excellent model kits.

Warfare In Scale is a TV program on-line that board the model kits hobby in the worldwide. It has already been existed for 2 years. The program has an approximated length of 40 minutes. It takes place every 2 months approximately because of the difficulty of filming and video processing. In every chapter, a qualified modeler makes a tutorial from the beginning to the end and explains different techniques into this field. They board different aspects into this hobby, military, Sci-Fi, civil, figures, aircraft, dioramas, use of products, weathering, etc. Warfare In Scale tutorials are valuable and useful for both junior and senior modelers.

There are already Warfare In Scale tutorial programs for MENG's VS-001 PICKUP w/ZPU-1 model kit, SS-001 Vskfz 617 Minenräumer model kit, TS-001 Israel Main Battle Tank Merkava Mk.3D Early model kit and TS-002 British A39 Tortoise Heavy Assault Tank model kit. These programs are very popular among modelers as they are helpful for their own building of MENG kits. MENG will keep on working with Warfare In Scale program team to bring global modelers more and better tutorial programs for MENG's model kits.
