THE ART OF MODELING

From plastic models and radio-controlled cars to educational construction kits, Tamiya produces over 800 types of fun-filled items. Tamiya's commitment to be "First in Quality Around the World" ensures that only top-notch parts are used for each and every item, and is the reason why Tamiya has become a household name among hobby enthusiasts around the world.

Tamiya's scale models possess such intricate detail that they are often described by modeling connoisseurs as "museum items". These models are nearly perfect replicas of full-size objects, shrunk down to a smaller scale. Through the process of assembling, painting and finishing these accurate models by hand, one is provided with a unique "three-dimensional" insight into the shape and vast detail of the full-sized object at a mere glance. So in addition to the fun of building an accurate replica, Tamiya's kits also provide the joy of learning about the real thing.

Tamiya also offers exciting "mini-motorports" in the form of Mini 4WD and Dangan Racers. The impressive performance of these minute assembly vehicles can be upgraded with a variety of grade-up parts, allowing racing fun for kids of all ages.

Tamiya's Educational Construction Series focuses on the assembly of fascinating devices that move under their own power. Through the assembly of gears and pulleys, one can learn about the relationship between power and speed. By putting together cams, cranks, and link mechanisms, one can understand the principles of centrifugal force. Furthermore, Tamiya's incorporation of "clean energy" in its items, such as the use of solar cells to generate power, is yet another benefit of this series. Finally, with a full range of supplementary hobby items such as paints and finishing tools, Tamiya offers comprehensive support to the world's hobbyists. So whether it's careful attention to quality, or the commitment to ease-of-assembly and customer support, Tamiya is always striving to create truly fulfilling ways to spend one's time.

Tamiya also places great importance on customer feedback in the development of new items. The internet homepage, www.tamiya.com, puts Tamiya and Tamiya's agents in direct contact with hobby fans around the world. This informative site is frequently updated and features descriptions of new releases with full color pictures, video clips, and assembly tips. Also featured is information about upcoming hobby shows, contests, R/C races, and just about everything a computer-equipped hobby fan could want in a homepage. Check out www.tamiya.com today!

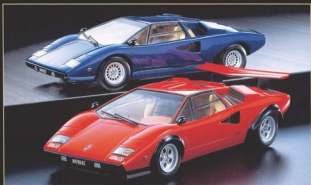

EL ARTE DEL MODELISMO

Desde maquetas de plástico y vehículos de radio control hasta kits de montaje educativos, Tamiya produce más de 800 artículos llenos de diversión y entretenimiento. El compromiso adquirido por Tamiya, que figura en su slogan "First in Quality Around the World" (líder mundial en calidad), garantiza que solo se utilicen materiales de primera calidad en la construcción de cualquiera de sus artículos, y constituye además la razón por la que Tamiya se ha convertido en la referencia entre los aficionados al hobby en todo el mundo.

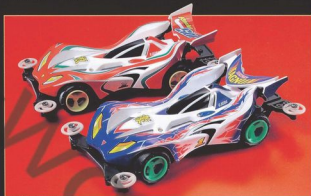

Los modelos de Tamiya reproducen los originales con tanta fidelidad y grado de detalle, que son consideradas piezas de museo, por los modelistas expertos. Estos modelos son réplicas prácticamente perfectas de los objetos que reproducen a un tamaño reducido. A través del proceso manual de montaje, pintura y acabado, el modelista llega a tener una percepción tridimensional precisa y detallada del objeto real. Por ello, además de la diversión que resulta de la propia construcción de la maqueta, los kits de Tamiya proporcionan también la satisfacción de conocer muchos aspectos del objeto real.

Tamiya te ofrece también pequeños vehículos motorizados de 2 tipos (Mini 4WD o Dangan Racers). Estos modelos de increíbles prestaciones se ensamblan en minutos y pueden mejorar sus prestaciones con el uso de piezas especiales, permitiendo disputar divertidas competiciones a niños de cualquier edad.

La línea de construcciones educativas de Tamiya se centra en el ensamblado de artículos fascinantes que utilizan su propia energía para realizar alguna función. Mediante el ensamblado de piñones y poleas, se asimilan fácilmente nociones importantes como la relación entre la potencia y la velocidad. Acoplando levas, manivelas y elementos de transmisión, se comprenden rápidamente los fundamentos de la fuerza centrífuga. Además, la incorporación de la energía ecológica, con el uso de pequeños paneles solares para generar la potencia necesaria, constituye un aliciente añadido. Finalmente, con una amplia línea de accesorios como pinturas y herramientas de acabado, Tamiya proporciona todo lo que los modelistas necesitan. Manteniendo firmemente su compromiso de calidad y facilidad en el montaje, Tamiya se esfuerza continuamente para proporcionarnos una forma divertida de disfrutar de nuestro tiempo libre.

With cooperation from what was then Rockwell International, the delta-winged form has been accurately recreated, complete with detailed cockpit, landing gear, and engine thrusters. The cargo area hatch can be opened and closed and a detachable space lab can be fitted. The kit also features movable rudder/ speed brake and thrusters, decals for the current markings of the Discovery, Atlantis, and Endeavor, and a stand to enable an in-flight display.

La escotilla de la zona de carga se puede abrir y cerrar y se puede equipar con un laboratorio espacial desmontable. El kit también dispone de alerones móviles para permitir tanto el frenado como distintas maniobras, calcas para las versiones actuales del Discovery, Atlantis, y Endeavor, y una base para permitir su exhibición en pleno vuelo.

1:35 Scale MILITARY MINIATURE SERIES Milestone 300th Release!

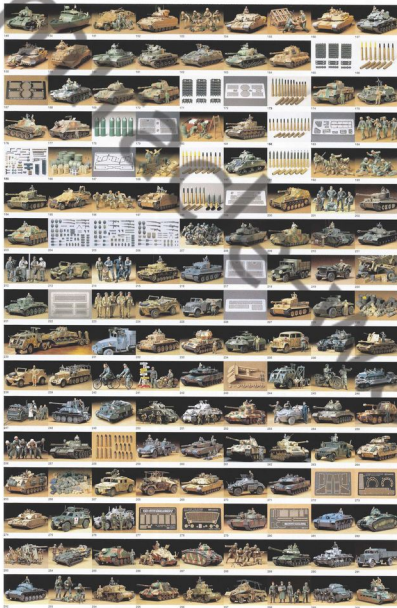

In the early days of military models, motorized tanks were typical. In 1968, Tamiya broke new ground by releasing the German Army Tank Crew, the first ever set in the famous 1/35 Military Miniature Series. From this origin, a wide array of static display models of tanks, tanks vehicles, figures, artillery, and diorama accessories have introduced Tamiya also introduced new ways to enjoy these models, encouraging modelers to create realistic dioramas and photograph their masterpieces. This series is recognized as an international standard for military modelers and hobbyists (see US 300th Churchill Crocodile), 200 (Weisel), and 300 (Mitsuda Mx. 100) milestones, continues to expand as impressive new up.

MAQUETA NÚMERO 300 ¡TOO UN HITO!

En las primeras épocas del modelismo militar eran escasos los tanques motorizados. En 1968, Tamiya introdujo el primer modelo en su armadura serie de Miniaturas Militares a escala 1:35: la reproducción de tanques del ejército Alemán. Desde entonces, se ha ido incorporando a esta línea gama de modelos estáticos como tanques, vehículos, figuras, artillería y accesorios para dioramas. Tamiya introdujo igualmente nuevas formas de disfrutar de dichos modelos, animando a los modelistas a la creación de dioramas reales y fotografíar sus obras maestras. Esta Serie es reconocida como ya estándar internacional para el modelismo militar habiendo superado ya los hitos de 100 (Churchill Crocodile), 200 (Weisel) y 300 (Mitsuda Mx. 100) modelos y continúa su expansión con nuevos modelos.

WIND-UP POWER GENERATOR SET

The battery-free set lets you watch your generated green energy in action. Winding the handle of the generator unit will generate electricity, which is stored in the capacitor installed in the motorized car. More than 30 seconds of winding will produce enough power to run the car for approximately 1 minute. Secure connectors ensure easy attachment of the cap to the generator unit.

Este set sin batería le permite controlar en directo la generación de energía verde a la exposición al viento de la unidad generadora produciendo electricidad que se almacena en un condensador instalado en el coche motorizado. Más de 30 segundos de viento generan suficiente potencia para que el coche funcione durante el tiempo suficiente. Los conectores seguros garantizan la facilidad de conexión del coche a la unidad del generador.

75021 LOOPWING WIND POWER GENERATOR SET

This educational assembly kit lets you explore the mechanisms involved in harnessing the alternative energy of wind power. The distinctive looping design can be rotated by the slightest breeze, and will accumulate enough energy to power the motorized car connected to the top of the unit. Car with moveable front wheel may be set to run in a circle, allowing users to witness the conversion of wind power into working electricity before their very eyes. Two types of gears can be selected to allow generation of higher amounts of power depending on wind speed. Stand features built-in weight to keep the unit steady on a flat surface. Stand also features grip so that it may be held in the hand while running to generate wind power.

Este kit de montaje educativo le permitirá explorar los mecanismos que se utilizan para aprovechar la energía eólica. El característico diseño del modelo le permite girar con la más ligera brisa, y así se acumula la energía necesaria para poner en marcha el vehículo conectado a la unidad. El coche, con las ruedas delanteras móviles, puede ajustarse para que avance en círculo. Así todos sus amigos serán testigos de cómo la fuerza del viento se convierte en energía eléctrica. Podrá escoger entre dos engranajes diferentes, de manera que se genere la máxima cantidad de energía posible dependiendo de la velocidad del viento. El soporte del kit es lo suficientemente pesado para que la unidad se mantenga estable sobre una superficie lisa. Además, está preparado para que pueda sujetarlo cómodamente mientras está en funcionamiento.

75024 SOLAR CHARGER SET

Experience green energy first-hand with this educational set. The 2.0V, 125mA solar panel generates electricity, which is stored in the capacitor onboard the 3-wheeled motorized car that docks with the charger terminal. Detach the car, set the movable front wheel, and watch the sun's power in action.

Experimenta la energía limpia de primera mano con este set educativo. El panel solar de 2.0 V y 125mA genera electricidad, que se acumula en el condensador del coche motorizado a 3 ruedas que se acopla a la terminal del cargador. Separa el coche, coloca la rueda frontal móvil y observa el poder del sol en acción.

COLECCIÓN DE MINIATURAS MILITARES (MONTADAS)

Tamiya presenta una nueva colección de modelos a escala 1/48 totalmente montados y con el mayor grado de realismo posible. Estos modelos, atractivamente pintados tienen un acabado desgastado que realiza aún más su parecido con los vehículos reales. Se incluye una base especial para su exhibición en la que hay una placa con el nombre del modelo. Únicamente en los modelos de calidad tan alta como éstos el casco inferior es de metal inyectado, pues así la maqueta es más pesada y eso le añade realismo.
