MOLDING

Injection Moulding

After many years of development and the recent release of many top quality kits, **Trumpeter** is now an internationally recognized injection molded plastic model kit manufacturer. We have progressed rapidly in the tooling and production of unique subjects in excellent detail and quality and wish to thank everyone for their enthusiastic support and response.

Our goal is to continue to produce top-quality model kits with world-wide appeal. Subjects will include prototypes from Asia, Europe, the USA and more in order to satisfy the demands of modelers across the globe. We welcome your comments on our kits as we are always interested in finding out whether we can improve on our products or whether there are suggestions for subjects which we could consider tooling.

In the following pages you will see kits currently in production as well as many kits in development for release in 2003 & 2004. These upcoming releases are all newly tooled and completely designed and developed by ourselves using photos, books, blueprints and other reference materials. **Trumpeter** uses the most up to date technological equipment which enable us to produce kits of incredible detail using the most modern computerized methods. This ensures that all kits include the maximum number of details as including recessed panel lines, rivet details, ship deck lines, etc. **Trumpeter** model kits will revolutionize the model industry with their top quality kits.

We invite you to have a look at this 2003-2004 **Trumpeter** catalog to see the unique kits that you can expect to see produced in the next 2 year. There is a bright future in modeling from **Trumpeter** to you!
